ABOUT

CoinSafari is a groundbreaking token project built on the Solana blockchain. As the network's first rewards-based full-service travel booking platform, CoinSafari seeks to disrupt the travel industry while bringing new and exciting real-world utilities to both travelers and crypto enthusiasts.

The Platform: An Overview

In today's fast-paced world, travelers seek convenience, affordability, and flexibility when planning their journeys. CoinSafari addresses these needs by introducing a comprehensive travel booking platform powered by blockchain technology. Leveraging the speed and efficiency of Solana, CoinSafari offers users a seamless experience with discounted travel options, multiple payment methods, and a rewarding loyalty program.

CoinSafari offers several key benefits that differentiate it from traditional travel platforms:

Discounted Travel: CoinSafari provides access to discounted travel bookings, allowing users to save money on flights, hotels, and activities at rates that are often lower than other leading platforms such as Expedia.

Rewards and Incentives: By booking travel through CoinSafari, users earn \$COINS rewards that can be redeemed for future travel bookings or converted into cash. The platform also offers incentives for referrals and participation in promotions, as well as revenue sharing and NFT staking, further enhancing the value proposition for users.

Flexibility and Convenience: With multiple payment options, personalized recommendations, a user-friendly mobile application, and AI-powered tools, CoinSafari offers unparalleled flexibility and convenience in travel planning and booking. Users can tailor their travel experiences to their preferences and enjoy a seamless journey from start to finish.

Community Engagement: CoinSafari fosters a vibrant community of travelers and cryptocurrency enthusiasts, where users can share their experiences and connect with like-minded individuals.

UTILITIES

CoinSafari offers a diverse range of utilities that cater to the needs and preferences of modern travelers, seamlessly integrating blockchain technology and crypto investing with the excitement of exploring the world.

Discounted Travel Platform: CoinSafari provides users with access to a discounted travel platform, where they can book flights, hotels, car rentals, and activities at rates that are often below those of leading platforms. This is accomplished by reducing commission fees to far below the industry average. With a vast network of partners and suppliers worldwide, CoinSafari ensures that users can explore their dream destinations without breaking the bank.

AI and AR-Powered Capabilities: Leveraging the power of artificial intelligence (AI), the CoinSafari platform will leverage advanced technologies to enhance the travel experience. AI algorithms will analyze user preferences, historical data, and market trends to provide personalized recommendations, optimize itineraries, and deliver intelligent insights, ensuring that every journey is tailored to the individual needs of the traveler. Experience travel like never before with AR. Hunt for hidden \$COINS rewards around the world with Apple Vision Pro.

Travel Rewards: As users book travel through the CoinSafari platform, they earn rewards in the form of \$COINS, the native cryptocurrency of the CoinSafari ecosystem. \$COINS can be redeemed for future travel bookings or for cash, providing users with additional incentives to explore new destinations and embark on exciting adventures.

Social Integration. CoinSafari integrates social media features that enable users to share their travel experiences, connect with fellow travelers, and inspire others to explore the world. By sharing travel photos and experiences on social media platforms, users can earn additional rewards in \$COINS, creating a vibrant community of travelers within the CoinSafari ecosystem.

Mobile App: With the CoinSafari mobile app, users will be able to easily access their travel itineraries, book flights and accommodations, and manage their rewards on the go. The mobile app offers a seamless and intuitive user experience, allowing travelers to plan and enjoy their adventures anytime, anywhere.

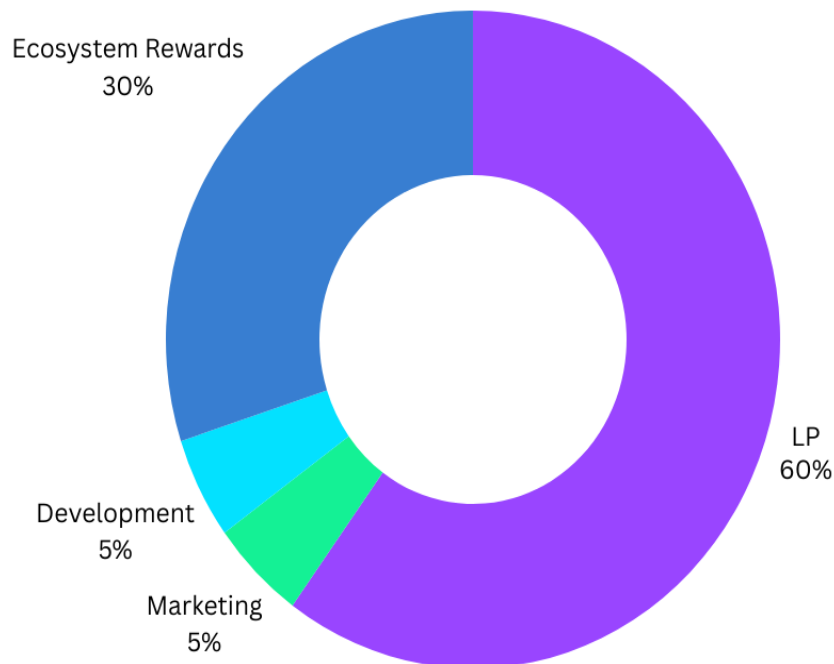

NFT Travel Passport and Staking: CoinSafari offers a digital travel experience unlike any in the industry. \$COINS holders can access a Non-Fungible Token (NFT) travel passport, where users can collect NFTs representing places they have visited. By staking these NFTs, users can earn rewards in the form of \$COINS and other prizes such as free vacations, providing a unique and memorable way to document their travel experiences while earning tangible rewards.

Access to Group Travel Destinations and Special Events: CoinSafari offers users access to group travel destinations and special events, providing opportunities to connect with like-minded travelers and participate in curated travel and crypto experiences. Whether it's a group tour to a remote destination or a special event hosted by CoinSafari, users can discover new adventures and create lasting memories with fellow members of the community.

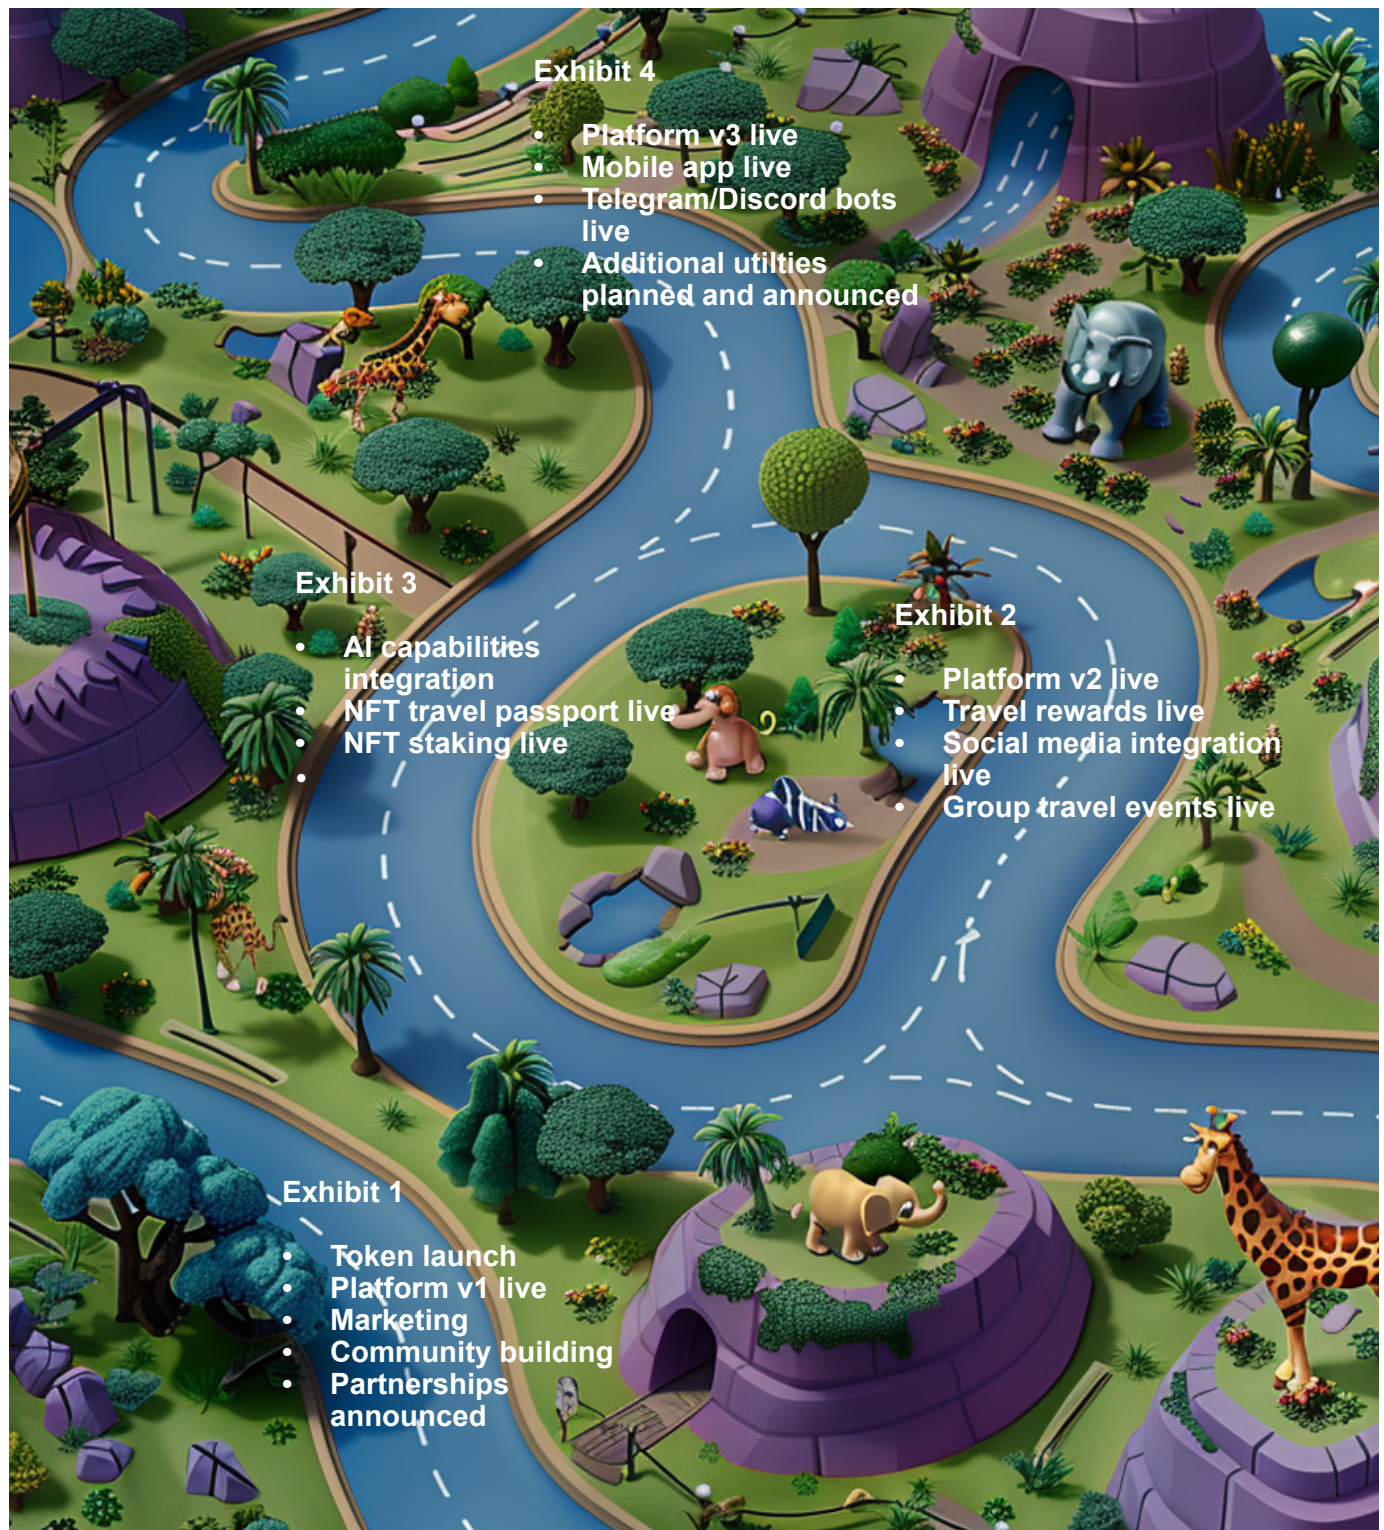

TOKEN

\$COINS is the native token of the CoinSafari ecosystem. The token not only serves as a means of storing wealth, but fulfills several important functions. First, holders of \$COINS will be eligible to receive a proportionate share of revenue earned through the platform. Revenue distributions will occur every 30 days. Second, \$COINS fuel the travel rewards system, with 30% initially set aside for future allocation. These tokens will be locked until the rewards component of the platform is live.

Since there are no taxes on buys, sells, or transfers, 10% of the \$COINS supply will be set aside for marketing and development. The remaining 60% will be added to the Raydium LP.
